# Our two-stage consultancy approach

## Pay less for what you consume

We'll find you the best supplier, contract term and strategy

Our **Bill Checking Service** for electricity, gas and water provides peace of mind and ensures you only pay for what you need

Our access to tariffs from major gas and electricity suppliers, allows us to find competitive energy prices for your business

## Consume less by improving efficiency

Our **Energy Health Check** lets you to benchmark your business against those in the same industry and of a similar size, to look for savings opportunities

Our structured approach will create an energy management strategy to reduce your usage - often by 20% or more

We'll support you with ways of securing external funding for energy efficiency improvements

We'll project manage any upgrades to ensure your investment is delivered on time, on budget, and drives the expected efficiencies and payback

## Why work with us

**Free and impartial advice**, from your one stop service for electricity, gas and water

**We complete a 360° health check** of your business, and identify savings and areas of waste

**We advise** on the best supplier, contract term and strategy (float or fix) to meet your specific needs

Your contract will always be **directly with the supplier(s)**

Working with you, our **dedicated account manager** will tailor-make an energy plan to match your organisation's needs and deliver time and cost savings

We take care of the **switching process** for you, and renewing your contracts

**We run periodic checks** to ensure the contracts and prices are in line with what was agreed with each supplier to ensure you are getting the best return on your investment
